

Where Efficiency Meets Intelligence

Operational Automation
for Measurable Business Impact

2bbooster.com

Who We Are

At **2Bbooster**, we help companies **fix broken operations**.

Our mission is simple: to eliminate repetitive manual work, remove bottlenecks, and connect disjointed systems — so that teams move faster, make fewer errors, and focus on what truly matters.

We believe **efficiency should serve intelligence** — not replace it. That's why every project we deliver starts with tangible results: **quick wins that scale** into enterprise-wide automation.

What We Do

We deliver **end-to-end intelligent automation**, combining technology and process expertise to drive measurable ROI.

Robotic Process Automation (RPA)

From discovery to deployment — we design, build, and govern automation that removes repetitive work. **Every automation has a business case, metrics, and clear accountability.**

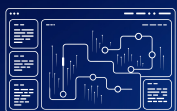

CRM / ERP Integration & Customization

We unify Sales, Support, Finance, and Operations by connecting and tailoring CRM systems (such as Bitrix24) to match real processes — not the other way around.

AI Integration & Machine Learning Solutions

We deliver advanced **AI integration services** and **machine learning solutions** that transform raw data into actionable insights, helping companies drive growth, efficiency, and ROI.

Workflow Optimization & Consulting

We map your current processes, identify gaps, define KPIs, and create an **ROI-driven roadmap** for continuous improvement.

AI Agents Integration

We provide **AI agent integration** that transforms business performance. These agents adapt, learn, and make decisions in real-time, helping our clients achieve measurable ROI

The outcome:

When your teams spend more time managing work than delivering it — that's when 2Bbooster delivers impact.

The Problems We Solve

Modern companies waste enormous potential on **manual, disconnected, and invisible processes**.

Tasks repeat endlessly, approvals stall, and data loses meaning across silos.

As a result, growth slows not because teams lack talent — but because their time is trapped in inefficiency.

WE STEP IN WHEN:

Repetitive work drains hours and morale.

Fragmented systems create confusion and double-entry.

Approval delays block decisions and revenue.

KPIs disappear in spreadsheets and email threads.

Inconsistent onboarding hurts customer experience.

Messy data hides opportunities for growth.

In short:

When your teams spend more time managing work than delivering it — that's when 2Bbooster delivers impact.

Our Method: Simple, Low-Risk, ROI-Led

We know automation can feel complex. That's why our process is **structured for clarity and proof** from day one.

01

Diagnose & Prioritize

We analyze your operations, quantify waste, and select **1-3 high-ROI candidates** for a pilot.

02

Pilot & Prove Value (2-4 weeks)

You get a **working automation** in weeks — not months — with measurable KPIs like **time saved, accuracy, and SLA improvement**.

03

Scale & Integrate

Once value is proven, we expand automation across systems (CRM, ERP, RPA, AI) with full change management and governance.

04

Measure & Optimize

Our dashboards and SLAs ensure continuous improvement — automation becomes a **compounding asset**, not a one-time project.

Where We Deliver Value

We bring measurable improvements across functions — from finance to operations.

Every optimized workflow becomes a foundation for smarter, faster, and more connected business performance.

Finance & Accounting

invoices, reconciliations, reporting, compliance.

Sales & CRM Operations

lead routing, data enrichment, renewals, quote-to-cash.

Customer Support

ticket triage, FAQ automation, CSAT feedback loops.

HR & Recruiting

onboarding, screening, access provisioning.

Operations & Supply Chain

order tracking, vendor onboarding, inventory sync.

Each use case starts with the same question:

"Where is your time leaking today — and how fast can we stop it?"

Proof in Numbers: Real Impact

A recent project shows what 2Bbooster can do at scale.

A client faced **58,000+ inconsistent sales records**, spread across systems. Manual cleanup would have required over **2,800 hours** and frozen revenue operations.

In days, our automation cleanses and enriches data — delivering unified, actionable insights.

THE RESULTS:

2,824
hours saved.

\$60K
saved in labor costs.

86%
faster data processing.

+33%
more upsell
opportunities.

+32%
higher sales
in the first month.

8
strategic projects unblocked
thanks to freed capacity.

Why Companies Choose 2Bbooster

Operations First, Tools Second.

We design automation around your workflows and KPIs — not vendor limitations.

Depth from Bots to Intelligence.

RPA, AI, CRM, ERP — all working together as a single, scalable system.

Consulting-Level Rigor.

Each project has a clear business case, ROI model, and governance plan.

Full Transparency.

Every saved hour, reduced cost, and improved SLA is tracked and reported.

The Outcomes You Gain

With 2Bbooster, automation becomes a **strategic asset**, not just a tool.

EXPECT:

- ✓ Lower operating costs and predictable SLAs.
- ✓ Faster turnaround from request to completion.
- ✓ Fewer errors and audit-ready data.
- ✓ Unified visibility across teams.
- ✓ Happier customers and employees — less copy-paste, more value.
- ✓ Compounding ROI as automation scales.

Every process we optimize pays you back — again and again.

Ready to Fix the Work That Slows You Down?

Start with a low-risk, high-impact pilot that proves measurable value
in 30 days — and then scale what works.
